Oracle Cloud Infrastructure 2018 Architect Associate

The advertisement features a central image of a white and blue product box labeled 'TESTSEXPERT Complete Guide' and a blue CD. A red circular badge on the box reads '100% MONEY BACK GUARANTEE'. To the left, a vertical banner shows a folder icon and the text 'Complete Course Coverage'. To the right, a blue banner displays the 'TESTSEXPERT' logo and 'Ultimate IT Test Preparation Material'. Below the CD, the text 'Complete Course Coverage' is repeated.

Question: 1

Which two parameters are required in a back end set's HTTP health check? (Choose two.)

- A. response body
- B. URL path
- C. timeout
- D. port
- E. status code

Answer: AE

Reference:

<https://docs.cloud.oracle.com/iaas/Content/Balance/Tasks/editinghealthcheck.htm>

Question: 2

Which two are true for achieving High Availability on Oracle Cloud Infrastructure? (Choose two.)

- A. Store your database across multiple regions so that half of the data resides in one region and the other half resides in another region.
- B. Attach your block volume from Availability Domain 1 to a compute instance in Availability Domain 2 (and vice versa) so that they are highly available.
- C. Configure your database to have Data Guard in another Availability Domain in Sync mode within a region.
- D. Store your database files on Object Storage so that they are available in all Availability Domains in all regions.
- E. Distribute your application servers across all Availability Domains within a region.

Answer: BE

Question: 3

Which two configuration formats does Terraform support? (Choose two.)

- A. YAML
- B. JSON
- C. HCL
- D. XML

Answer: BC

Reference:

<https://docs.cloud.oracle.com/iaas/Content/API/SDKDocs/terraformconfig.htm>

Question: 4

At the end of a terraform apply operation, what is the default output?

- A. nothing by default
- B. statistics about what was added, changed, and destroyed
- C. the entire state file
- D. statistics about what was added, changed, and destroyed, and the values of outputs

Answer: D

Reference: <https://www.terraform.io/intro/getting-started/outputs.html>

Question: 5

You have created a public subnet in a VCN, and your public subnet has a Route Table, a Security List, and an Internet Gateway. However, none of the compute instances can connect to the Internet. Which two are possible reasons for the connectivity issue? (Choose two.)

- A. There is no Dynamic Routing Gateway (DRG) associated with the VCN.
- B. The Route Table has no default route for routing traffic to the Internet Gateway.
- C. There is no stateful ingress rule in the Security List associated with the public subnet.
- D. There is no stateful egress rule in the Security List associated with the public subnet.

Answer: AC

Question: 6

You want an instance in your compartment to make API calls to other services within Oracle Cloud Infrastructure without storing credentials in a configuration file. What do you need to do?

- A. No action is required. By default, all VM instances are created with an Instance Principal.
- B. Instances cannot access services outside their compartment.
- C. VM instances are treated as users. Create a user and assign the user to that VM instance.
- D. Create appropriate matching rules in the Dynamic Group to create an Instance Principal.

Answer: A

Reference: <https://medium.com/@tigerbabu/oracle-cloud-infrastructure-associate-architect-notes-4495b25b24a4>

Question: 7

Which three must be configured for a load balancer to accept incoming traffic? (Choose two.)

- A. a listener
- B. a back-end server
- C. a back end set
- D. a security list that is open on a listener port
- E. a certificate

Answer: ADE

Reference: <https://docs.cloud.oracle.com/iaas/Content/Balance/Tasks/managinglisteners.htm>

Question: 8

Which two statements are true about Oracle Cloud Infrastructure Compute Service? (Choose two.)

- A. You can launch a virtual or bare metal instance by using the same LaunchInstance API.
- B. You cannot launch a bare metal server in Oracle Cloud Infrastructure Compute Service.
- C. You can attach a block volume in an Availability Domain other than your compute instance.
- D. You can share custom images across tenancies and regions.

Answer: AD

Reference: <https://docs.cloud.oracle.com/iaas/Content/Compute/Tasks/imageimportexport.htm>

Question: 9

Which five are the required parameters to launch an instance in Oracle Cloud Infrastructure? (Choose five)

- A. subnet
- B. Availability Domain
- C. Virtual Cloud Network
- D. host name
- E. instance shape
- F. image operating system

G. private IP address

Answer: ABCEF

Reference: <https://docs.cloud.oracle.com/iaas/Content/Compute/Concepts/computeoverview.htm>

Question: 10

Which DNS resource record type is used to point a host name to an IPv4 address?

- A. ALIAS
- B. A
- C. CNAME
- D. AAAA

Answer: B

Reference: <https://docs.cloud.oracle.com/iaas/Content/DNS/Reference/supporteddnsresource.htm>
